OBJECTIVE:

Self-driven and passionate MERN Stack Developer with a strong commitment to learning and delivering complete solutions. Believes in finishing what is started, and consistently applies newly learned skills to real-world projects. Focused on building clean, responsive web designs through collaborative effort and continuous improvement. Looking for a developer role to grow, contribute, and create impactful web applications.

SKILLS:

- React js
- Express.js
- Node.js
- MongoDB
- HTML
- CSS
- Bootstrap
- Tailwind Css
- JavaScript
- Postman
- Git
- GitHub

PROJECTS:

Explore more projects in the **My Latest Work** section of my portfolio. Each project is live and clickable. Visitors can also contact me directly via a working email form integrated with an active mail API.

Netflix Clone

- Built a responsive Netflix UI clone using React.js. Integrated **TMDb API** to fetch movie data dynamically. Each movie is clickable with hover effect and modal display. Used JavaScript for UI logic and CSS for styling.

Gemini Clone (Chat UI)

- Developed a fully functional Gemini-style chatbot using React.js. Supports dynamic Q&A with a realistic layout. Integrated open API with simulated delay due to limited free plan, closely mimicking the real Gemini app experience.

Food Delivery App

- Created a food ordering front-end app with React.js and JavaScript. Designed menu, cart, and order pages with smooth interactions. Focused on clean UI and reusable components.

Real Estate Website

- Designed a modern real estate website using **Tailwind CSS** and React.js. Includes property cards, search filters, responsive layouts, and clean navigation.

YouTube Clone

- Implemented a YouTube-like UI using React.js and **YouTube Data API**. Features real-time video search, playback, and video cards with thumbnails and titles.

EDUCATION:
