🪪 OBJECTIVE

Self-driven and passionate MERN Stack Developer with a strong commitment to learning and delivering complete web solutions. Focused on clean, responsive designs and real-world projects. Seeking a developer role to grow, contribute, and build impactful applications.

🎓 EDUCATION

Bachelor of Engineering (B.E) - Electronics and Communication Engineering,   06/2019 – 07/2023
Nandha College of Engineering, Erode

🧠 TECHNICAL SKILLS

Frontend — HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind CSS

Backend — Node.js, Express.js

Database — MongoDB

Tools & Others — Git, GitHub, Postman

📂 PROJECTS

Netflix Clone, *Built a responsive UI using React.js, integrated the TMDb API to fetch movie data, and implemented hover effects and modal functionality using JavaScript and CSS.*

Gemini Clone (Chat UI), *Created a Gemini-style chatbot using React.js with a clean UI, simulating real-time Q&A interactions via a mock API.*

Food Delivery App, *Designed a food ordering front-end using React.js and JavaScript, featuring menu, cart, and order pages with smooth navigation.*

Real Estate Website, *Developed a modern real estate platform using React.js and Tailwind CSS, featuring a responsive design, property filters, and a clean UI.*

YouTube Clone, *Built a YouTube-like UI using React.js and the YouTube Data API, supporting real-time search, video playback, and dynamic content display.*
